DEICING PRODUCTS

INTRODUCING *Headwaters*[®]

Add *Headwaters* corrosion inhibitor to salt brines to reduce immediate expenses, long-term costs and environmental impact. Approved by the Pacific Northwest Snowfighters, *Headwaters* inhibitor cuts corrosion by more than 70%—extending the life of snowfighting equipment, bridge rebar and abutments, guardrails, and private vehicles.

ADVANTAGES

- Low addition rate = cost savings
- Stable and free-flowing
- Biobased and biodegradable
- Lowest toxicity in the industry

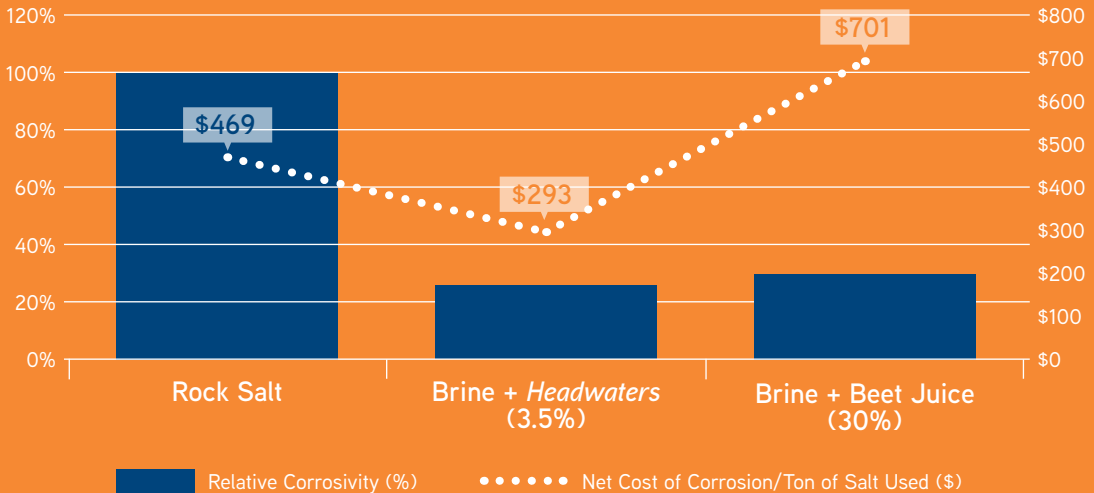

WHAT THIS MEANS FOR YOUR BUDGET

- For every \$1 spent on *Headwaters* corrosion inhibitor, your state or municipality can avoid \$3 of corrosion damage to highway infrastructure, vehicles and equipment.
- *Headwaters* offers the highest-performing inhibitor in its class, enabling a 30% lower addition rate than other inhibitors.
- By reducing the add rate to your brine, *Headwaters* delivers significant savings on product transportation, testing and storage.

A metal coupon immersed in salt brine treated with *Headwaters* corrosion inhibitor shows substantially less corrosion (right) than a coupon immersed in salt brine.

THE COST OF CORROSION

ABOUT *Headwaters* DEICING PRODUCTS

Serving the snowfighting community with new solutions to age-old problems—keeping roads clear at less cost to the built and natural environment.

ABOUT HARMONEY DEICING

Applying innovative technology to renewable resources, that help our customers improve the performance, cost position and sustainability of their products.
